SUMMARY

MERN Stack Developer with 1+ year of professional experience in building scalable web applications using MongoDB, Express.js, React.js, and Node.js. Strong expertise in backend development, RESTful and GraphQL APIs, JWT-based authentication, and database-driven systems. Experienced in developing enterprise tools, employee management systems, and AI-powered applications including Retrieval-Augmented Generation (RAG). Proficient in Docker-based deployments, Nginx configuration, and modern development workflows.

EDUCATION

Bachelor of Computer Applications (BCA) , Calicut University	2020 - 2023
Higher Secondary Education (+2) , DHSE Kerala	2018 - 2020

SKILLS

Programming Languages: JavaScript (ES6+), Python
MERN Stack: MongoDB, Express.js, React.js, Node.js
Frontend Technologies: Redux, Tailwind CSS, Bootstrap, Chakra UI
Backend & APIs: RESTful APIs, GraphQL, JWT Authentication
Databases: PostgreSQL, MongoDB, Vector Databases
AI Technologies: Retrieval-Augmented Generation (RAG), LLM Integration
DevOps & Tools: Docker, Nginx, Git, GitHub, Firebase, Postman, VS Code
CMS: WordPress

EXPERIENCE

MERN Stack Developer — RIOD LOGIC Pvt. Ltd, Thrissur, Kerala	April 2025 - Present
---	----------------------

- Developing and maintaining full-stack applications using the MERN stack for internal and client-based projects.
- Built employee management and time tracking software with role-based access, project-wise work logging, and reporting features.
- Designed and implemented RESTful and GraphQL APIs using Node.js and Express.js.
- Worked on AI-driven applications including Retrieval-Augmented Generation (RAG), integrating LLMs with vector databases.
- Assisted in deployment and environment setup using Docker and Nginx.
- Developed and customized WordPress-based websites with a focus on performance and responsiveness.

Backend Developer Intern — DiGi Suvidha Pvt. Ltd, Kottayam, Kerala	July 2024 - Jan 2025
---	----------------------

- Developed and maintained server-side logic, ensuring high performance and reliability.
- Integrated RESTful APIs to manage and retrieve application data efficiently.
- Utilized PostgreSQL for database management, optimizing queries and ensuring data integrity.

MERN Full Stack Developer Intern — Luminar Technolab, Kochi, Kerala	June 2023 - Jan 2024
--	----------------------

- Designed and developed web applications using React.js, improving frontend performance and user experience.
- Built secure and scalable backend services using Node.js and Express.js.
- Managed data storage and retrieval using MongoDB for scalable application architecture.

PROJECTS

Time Tracking Software (MERN Stack)

- Developed a full-stack time tracking and employee work management system using MongoDB, Express.js, React.js, and Node.js.
- Implemented project-wise work logging, user authentication, and role-based access control.
- Designed RESTful APIs and optimized database schemas for accurate data storage and retrieval.
- Built scalable backend services to support real-time data updates and reporting.

RAG Application (AI / Backend)

- Built a Retrieval-Augmented Generation (RAG) application integrating LLMs with vector databases.
- Implemented document ingestion, embedding generation, and semantic search pipelines.
- Developed backend services to retrieve contextual data and generate accurate responses.

Chatter-Box (MERN Stack)

[Live Demo](#)

- Developed a real-time chat application using the MERN stack and Socket.io.
- Implemented real-time messaging, user authentication, and responsive UI using Chakra UI.

Netflix Clone (MERN Stack)

[Live Demo](#)

- Built a Netflix-style web application with JWT-based authentication.
- Integrated third-party APIs for fetching movies, TV shows, and trailers.

CERTIFICATIONS

- Node.js Premium Course — Udemy, 2025
- JavaScript Certification for Intermediates — Sololearn, 2024
- MERN Full Stack Developer Internship — Luminar Technolab, 2024
