PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 2+ years of hands-on experience building and shipping production-grade web applications using React.js, Next.js, and TypeScript. Contributed across the full frontend scope of Wraft — an open-source document lifecycle management platform — owning the landing page, payment page, editor, notifications, document signatures, and history modules. Skilled in scalable monorepo architecture, ProseMirror-based rich text editor development, reusable UI component systems, REST API integration, and Figma design implementation. Strong problem-solving ability with a proven track record of meeting deadlines, debugging complex issues, conducting UI testing and QA, and communicating effectively across cross-functional teams. Open to Frontend Developer roles across India and GCC countries.

CORE COMPETENCIES

React.js • Next.js • TypeScript • JavaScript (ES6+) • Astro.js • Tailwind CSS • styled-components • ProseMirror • Turbo Repo • Storybook • REST API Integration • Context API • Redux • React Query • Figma (Design Implementation) • Git / GitHub • Linear • WCAG Accessibility • UI Testing & QA • Performance Debugging • Responsive Design • Monorepo Architecture

TECHNICAL SKILLS

Languages & Markup: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Astro.js, Node.js, Express.js, ProseMirror

State & Data: Context API, Redux, React Query

Styling: Tailwind CSS, styled-components, xstyled/emotion, Bootstrap

Tools & Platforms: Git, GitHub, Linear, Postman, VS Code, ESLint, Prettier, Storybook, Turbo Repo

Design & CMS: Figma (design extraction & implementation), Pages CMS, GitHub-connected content workflows

Core Competencies: Frontend Architecture, Responsive Design, WCAG Accessibility, RESTful API Integration, UI Testing & QA, Performance Debugging (Chrome DevTools), Monorepo Management, Conventional Commits

PROFESSIONAL EXPERIENCE

Frontend Developer (Freelance) | Self-Employed — Remote

Jan 2026 – Present

- Designed and developed avmunniarchives.com — a film industry blog — independently from architecture to production deployment using Astro.js, Tailwind CSS, and Pages CMS
- Integrated Pages CMS with GitHub so non-technical content editors can publish and update posts through a visual interface, with changes automatically reflected on the live hosted domain
- Built performance-optimized static pages with Astro.js achieving fast load times and strong SEO through static site generation
- Managed client communication and project delivery end to end, ensuring requirements were met within agreed timelines

Frontend Developer | Functionary Labs Pvt. Ltd — Calicut, Kerala

May 2024 – Dec 2025

- Owned and delivered multiple production modules on Wraft — an open-source document lifecycle management platform — including the landing page, payment page, rich text editor, notifications system, document signature functionality, and document history module
- Built scalable frontend architecture using Turbo Repo monorepo with four independent packages: web, doc, editor, and ui — enabling code sharing and independent deployability across the platform
- Created a reusable UI component library using TypeScript, styled-components, and xstyled/emotion, ensuring design consistency and reducing duplication across the codebase
- Implemented a ProseMirror-based rich text editor package with custom extensions for document creation, editing, and formatting — resolving complex editor state and rendering issues through deep debugging of the ProseMirror API

- Extracted design specifications and values from Figma and implemented pixel-accurate, responsive interfaces across all screen sizes using Tailwind CSS and Next.js
- Integrated RESTful APIs (GET, POST, PUT, DELETE) in close collaboration with two backend engineers, aligning on data contracts and resolving integration issues through clear, proactive communication
- Performed systematic UI testing and QA including cross-browser compatibility checks, layout bug identification, and Chrome DevTools performance profiling (memory snapshot analysis for leak detection)
- Authored comprehensive Storybook documentation for UI components, icons, and the design system to improve developer onboarding and component reuse
- Managed feature development using Git branch workflows with conventional commits — creating feature sub-branches, pushing changes for senior review, and merging only after approval
- Tracked, categorised, and resolved bugs collaboratively using Linear — reporting issues to senior developers, participating in team discussions, and managing the frontend bug resolution process
- Consistently delivered features ahead of deadline; proactively communicated blockers and clarified requirements with senior developers and the team lead before implementation
- Collaborated in a cross-functional team of senior developers, backend engineers, a UI designer, and an intern — providing guidance to the junior intern on frontend tasks

MERN Full Stack Developer Intern | [Luminar Technolab](#) — Kochi, Kerala *June 2023 – Jan 2024*

- Built and deployed web applications using React.js, improving frontend performance and user experience
- Developed secure, scalable backend REST APIs using Node.js and Express.js
- Managed data storage and retrieval using MongoDB with efficient, scalable data patterns

PROJECTS

Wraft – Open-Source Document Lifecycle Management | [wraft.app](#) | [GitHub](#)

- Open-source content authoring platform helping businesses produce structured documents — from official letters and contracts to collaborative workflows — built on Markdown and JSON for future-proof, accessible content
- Contributed end-to-end to the production frontend: landing page, payment flow, editor, notifications, document signatures, and history; built within a Next.js + TypeScript Turbo Repo monorepo
- Delivered reusable UI component library with Storybook documentation and a ProseMirror-based rich text editor package

Film Industry Blog – avmunniarchives.com | [avmunniarchives.com](#)

- Performance-optimized static blog with Astro.js and Tailwind CSS; Pages CMS wired to GitHub so content editors publish visually and the site redeploys automatically
- Sole developer — handled client communication, architecture, development, CMS setup, and production deployment independently

Doctor Appointment Booking Website | [GitHub](#)

- Multilingual healthcare platform with dynamic language switching (Hindi and regional languages), built with React.js and Tailwind CSS
- Includes real-time appointment scheduling and availability updates

Food Delivery App | [GitHub](#)

- Restaurant ordering platform with advanced food/price filtering, dynamic search, and responsive layout optimised for mobile and desktop using React.js and Tailwind CSS

EDUCATION

Bachelor of Computer Applications (BCA)

Calicut University, Kerala | 2020 – 2024

Higher Secondary Education (+2)

DHSE Kerala | 2018 – 2020

CERTIFICATIONS

- MERN Full Stack Developer Internship — Luminar Technolab (2024)
- NACTET Certificate — National Council for Technology and Training
